Report on Limited Review of condensed Interim Financial Statements

To the Board of Directors of Abu Dhabi Commercial Bank – Egypt (S.A.E)

Introduction

We have performed a limited review for the accompanying condensed interim financial statements of Abu Dhabi Commercial Bank – Egypt (S.A.E) which comprise of the condensed statement of financial position as of September 30, 2023 and the related condensed statements of income, comprehensive income, change in equity and cash flows for the nine months period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these condensed interim financial statements in accordance with the basis of recognition and measurement in accordance with the Central Bank of Egypt's rules issued on December 16, 2008 as amended by the regulations issued on February 26, 2019 and in accordance with the Central Bank of Egypt's rules issued on May 3, 2020 related to the issuance of the condensed interim financial statements and the prevailing Egyptian laws related to the preparation of the condensed interim financial statements. Our responsibility is to express a conclusion on these condensed interim financial statements based on our limited review.

Scope of Limited Review

We conducted our limited review in accordance with the Egyptian standard on review engagements (2410) "Limited Review of Interim Financial Statement Performed by the Independent Auditor of the Entity". A limited review of condensed financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the bank and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these condensed interim financial statements.

Conclusion

Based on our limited review, nothing has come to our attention that cause us to believe that accompanying condensed interim financial statements do not present fairly, in all material respects, the financial position of the bank as of September 30, 2023 and of its financial performance and its cash flows for the nine months period then ended in accordance with the bases of recognition and measurement issued by the central bank of Egypt's rules issued on December 16, 2008 as amended by the regulation issued on February 26, 2019 and in accordance with the Central Bank of Egypt's rules issued on May 3, 2020 related to the issuance of the condensed interim financial statements and the prevailing Egyptian laws related to the preparation of the condensed interim financial statements.

1- Background

- Abu Dhabi Commercial Bank- Egypt provides retail, corporate and investment banking services in Arab Republic of Egypt and abroad through 50 branches and employs 1190 employees as at 30 September 2023.
- Abu Dhabi Commercial Bank – Egypt (Union National Bank – Egypt formerly) which acquired (Alexandria Commercial and Maritime Bank formerly) is an Egyptian Joint Stock Company as a commercial Bank established in pursuance of Ministerial Decree no, 262 of 1981, published in the Official Gazette in September 12,1981 and in accordance with the provisions of Investment Law No, 43 for the year 1974 and its amendments, which was superseded by Law No, 230 for the Year 1989, cancelled by the Law No, 8 for the year 1997 concerning Investment Guarantees and Incentives. The Bank provides all banking services related to its activity and operates through its Giza - Head office, 50 branches and 167 ATMs, the bank is delisted on Egyptian stock exchange since March 25, 2020.
- The extraordinary general assembly dated January 13, 2007 decided to change the bank's name to Union National Bank – Egypt from Alexandria Commercial and Maritime Bank and it was annotated in the Bank's Commercial Register.
- The extraordinary general assembly dated June 1, 2020 decided to change the bank's name to Abu Dhabi Commercial Bank - Egypt instead of Union National Bank - Egypt, and this was indicated in the bank's commercial register on July 26, 2020.
- Board of Directors dated October 24, 2023 approved the adoption of the Condensed Interim Financial Statements for period ended September 30, 2023.

2- Summary of significant accounting policies

The following are the most important accounting policies used in preparing these financial statements. These policies have been consistently followed for all the years and period presented, unless otherwise disclosed.

A- Basis of preparation

The financial statements are prepared in accordance with Egyptian Accounting Standards issued during 2006 and its amendments and in accordance with Central Bank of Egypt instructions approved by its Board of Directors as at December 16, 2008 As well as the accompanying explanatory instructions issued in April 2009 and in conformity with the mentioned standards, and after releasing the instructions of the Central Bank of Egypt to prepare the financial statements of banks in accordance

with the requirements of IFRS 9 “Financial Instruments” issued by the Central Bank of Egypt on 26 February 2019 to be effective from January ,1 2019 , Management has adjusted certain policies to comply with these instructions the following notes details the changes in accounting policies.

These financial statements were prepared according to the related local laws.

The accounting policies used when preparing the condensed periodic financial statements are consistent with those used in preparing the financial statements for the year ending on December 31, 2022.

3- Financial risk management

The bank is exposed to various financial risks, Since the basis of financial activity is to accept risks; some risks or group of risks are analyzed, evaluated and managed all together, Therefore the bank aims to achieve an appropriate balance between the risk and return and to reduce the probable adverse effects on the bank’s financial performance.

The most important types of risks are credit risk, market risk, liquidity risk and other operating risks. the market risk comprises foreign currency exchange rates, interest rate risk and other price risks.

The risk management policies have been placed to determine and analyze the risks and to set limits to the risk and monitor them through reliable methods and updated systems.

The bank regularly reviews the risk management policies and systems and amends them in order to reflect the changes in market, products and services and the best updated applications.

Those risks are managed by risk department in the light of policies approved by Board of Directors.

The risk department determines, evaluates and covers the financial risks, in coordination with the bank’s various operating units, and the Board of Directors provides written policies for management of risks as a whole, in addition to written policies covering specific risk areas, like credit risk, foreign exchange rate risk, interest rate risk, and using the financial derivative and non–derivative instruments, Moreover, the credit risk department is responsible for periodical independent review of risk management and control environment.

A-3 Impairment and provisioning policies

The internal rating systems described in note (A/1) focus more on credit-quality at the inception of lending and investment activities, Otherwise, impairment provisions recognized at the balance sheet date for financial reporting purposes are losses that have been incurred and based on objective evidence of impairment as will be mentioned below, Due to the

different methodologies applied, despite different methods are applied there was no material impact for potential credit loss in the financial statement by the amount of loss estimated using expected loss model used as at 30 September 2023 for the purpose of compliance to the rules of the CBE in note (A/4).

The impairment loss provision appeared in the balance sheet at the end of the period is derived from the four internal rating grades, However, the majority of the impairment provision comes from the last two ratings, the table below shows the percentage of in-balance sheet items relating to loans and advances and the related impairment loss provision for each rating.

The bank's internal rating helps management to determine whether objective evidence of impairment exists under EAS (26) based on the following criteria set out by the bank:

- Payment delinquency of debtor or loan beneficiary.
- Breach of loan agreement such as a default in payment.
- Possibility of bankruptcy or entering liquidation procedures or financial restructures of granted credit.
- Deterioration of the borrower's competitive position.
- Due to economical or legal reasons, the bank agrees to grant the borrower additional benefits that would not normally be granted in normal circumstances.
- The impairment of the value of collateral.
- Deterioration of customer credit status.

The bank policies require the review of all financial assets that exceed defined relative importance at least annually or more when necessary, the impairment loss is determined on individual basis by assessing the realized loss at the reporting date on each individual case & to be applied individually to all account that have relative importance, Valuation usually includes the outstanding collateral, the related enforcements on these collaterals and the expected collections from those accounts, Impairment loss provision is formed based on group of similar assets using the historical experience available, personal judgment and statistical methods.

A-4 General module to measure banking general risk

In addition to the four categories of credit rating indicated in note (A/1) the management makes more detailed groups in accordance with the Central Bank of Egypt (CBE) requirements,

Assets exposed to credit risk in these categories are classified according to detailed conditions and terms depending on information related to the customer, its activities, financial position and payment performance,

The bank calculates the provisions required for impairment of assets exposed to credit risk, including commitments relating to credit on the basis of rates determined by CBE, In the case, the provision required for impairment losses as per CBE regulations exceeds the provision required for financial statements preparation purposes according to the Egyptian Accounting Standards, this increase shall be debited from the retained earnings to and credited to the "general banking risk reserve" under the equity caption, This reserve is regularly adjusted with this increase and decrease, to equal the amount of increase and decrease in the two provisions, This reserve is not distributable,

The rating categories based on internal evaluation techniques and their comparative figures used by the Central Bank of Egypt and the required provisions percentage for impairment of the assets exposed to credit risk.

The management is confident of its ability to maintain control on an ongoing basis and maintain the minimum credit risk resulting from the portfolio of loans and advances, and debt instruments as follows:

- 22.5 % of the loans and advances portfolio is classified at the highest two ratings in the internal rating.
- 87.1 % of the loans and advances portfolio having no past due or impairment indicators.
- Mortgage loans, which represent a significant part of the portfolio, are covered by guarantees.
- Loans and advances that have been evaluated on an individual basis of total amount EGP 1,9 Bn which represent 5.5 % and the provision formed and interest in suspense amount EGP 1,3 Bn represent 69.9 % of it.

The bank applies a more conservative way in granting loans and advances to customers during the period.

A-5 Maximum limits for credit risk before collaterals through OCI
Balance sheet items exposed to credit risks

<i>In Egyptian pound</i>	30 September 2023	31 December 2022
Treasury bills and other governmental securities through OCI	23 620 806 119	25 489 952 635
Customers loans and advances		
Retail loans:

Total at the end of the period	9 883 389	5 647 470	28 800 975	11 842 886	7 911 491	64 086 211

B- Market risk

The bank is exposed to market risks that the fair value or future cash flows of the financial instruments will fluctuate due to changes in market prices, Market risks emerges from open markets unsealed to interest rate, currency, and equity instruments; each is exposed to general and specific market movements and changes in sensitivity levels of market rates or prices such as interest rates, foreign exchange rates and equity instrument prices. The bank classifies its exposure to market risk into trading and non-trading portfolios.

The bank market risk department is responsible for managing the market risks arising from trading and non-trading activities.

Trading portfolios include transactions where the bank directly deals with clients or with the market; while non-trading portfolios primarily arise from managing assets and liabilities interest rate related to retail transactions. Non-trading portfolios also includes foreign currency exchange risk and equity instruments risks arising from the available-for-sale investments.

B-1 Market risk measurement techniques

As part of market risk management, the bank undertakes various hedging strategies as well as entering into fixed interest rate swap agreements. The significant measurement techniques used to control market risk are outlined below.

- Value at Risk

The bank applies a 'value at risk' methodology (VAR) for trading and non-trading portfolios to estimate the market risk of outstanding positions and the maximum expected losses based on a number of scenarios for various changes in market conditions. The board of director sets limits for the value at risk that may be classified separately by the bank as for trading and non-trading portfolios and the process is daily monitored by the risk management department.

Value at risk is a statistical expectation of the expected losses on the current portfolio resulting from adverse market movements. It represents the 'maximum' loss the bank is expected to incur. When using a specified confidence level, there is statistical probability that the actual losses exceed the estimated VAR. The VAR module assumes that there is a specified holding period (1 day) before closing the opened position. It also assumes that market movements during the holding period will be consistent with the previous day pattern The bank assesses the past movement based on data from previous periods, and applies these historical changes in rates, prices and indicators directly to its current positions this approach is known as

historical simulation. Actual outcomes are monitored regularly to test the validity of the assumptions and factors used in the VAR calculation.

The quality of the value at risk model is continuously monitored through assurance tests to the VAR results for trading portfolio and results are reported to the top management and board of directors.

- Stress Testing

Stress testing provides an indication of the expected losses that may arise from sharp adverse circumstances. Stress testing is designed to match business using standard analysis for specific scenarios. The stress testing carried out by the bank market risk department includes: risk factor stress testing where sharp movements are applied to each risk category, emerging market stress test where emerging market are subject to sharp movements, and special stress test including possible material stress events affecting specific locations or regions, for example the stress outcome to a region applying a free currency rate.

The results of the stress testing are reviewed by top management and board of directors.

B-2 VAR summary

The total value at risk for trading in addition to the active and listed shares for non-trading according to the type of risk as at:

30 September 2023

	Average	Maximum	Minimum
Foreign exchange risk	927,385	1,514,140	459,208
Interest rate risk	40,954,706	44,104,004	37,897,071
Equity instruments risk	-	-	-

31 December 2022

	Average	Maximum	Minimum
Foreign exchange risk	2,974,885	6,869,964	515,921
Interest rate risk	64,530,103	70,106,917	61,069,931
Equity instruments risk	-	-	-

The increase in VAR especially the interest rate risk is directly proportional to the increase in market interest rates volatility in the global financial markets.

The above three VAR results are calculated independently from the underlying positions and historical market movements with a simple way without using complex quantitative techniques. The aggregate of the trading and non-trading VAR results does not represent the bank's value at risk due to correlations between risk types and portfolio types and their various resulted effects.

B-3 The risk of fluctuation in foreign exchange rates

The bank is exposed to the risk of fluctuations in foreign exchange rates on the financial position and cash flows, and the Board of Directors has set limits for foreign currencies by the total value of each of the centers at the end of the day as well as during the day that is monitored at the moment. The following table summarizes the extent of the bank's exposure to the risk of fluctuations in the foreign exchange rate At the end of the financial position, the following table includes the book value of the financial instruments distributed in the currencies that make up them:

<i>In thousand Egyptian pound</i>	EGP	USD	Euro	GBP	Other currencies	Total

B-4 Interest rate risk

The bank is exposed to the impact of the fluctuation in interest rate prevailing in the market; this risk is defined as “cash flows interest rate risk” which is the risk of fluctuation in the future cash flows of a financial instrument due to changes in interest rates of the instrument. Fair value interest rate risk is the risk of fluctuation in the fair market value of a financial instrument due to changes in market interest rates. Yield margins may increase as a result of such changes but it may cause profits to decrease when unexpected movements occur.

The table below summarizes the bank’s exposure to interest rate risks including the financial instruments at carrying amounts classified according to its maturities

	<u>Up to one month</u>	<u>More than one month till three months</u>	<u>More than three month till one Period</u>	<u>More than one Period till five Periods</u>	<u>Financial Assets and Liabilities non interest bearing</u>	<u>Total</u>

C- Liquidity risk

Liquidity risk represents difficulty the bank faces in meeting its financial obligations when they fall due and replace funds when they are withdrawn. This may result in failure in fulfilling the bank's obligation to repay to the depositors and fulfilling lending commitments.

- Liquidity risk management process

The bank's liquidity risk monitoring process carried out by the bank's assets and liabilities management includes:

- Daily funding is managed by monitoring future cash expenditure to ensure that all requirements can be met when due. This includes availability of liquidity as they become due or to be lent to customers. The bank maintains an active presence in global money markets to ensure achievement of such objective.
- The bank maintains a portfolio of highly marketable securities that are assumed to be easily liquidated in the event of an unforeseen interruption of cash flows.
- Monitoring liquidity ratios in relation with internal requirements and Central Bank of Egypt requirements.
- Managing loans concentration and maturities.

For monitoring and reporting purposes, the bank calculates the expected cash flows for the next day, week and month which are the primary periods for liquidity management, the starting point to calculate these projections is analyzing the financial liabilities maturities and expected financial assets collections.

Assets and liabilities management monitors the mismatch between medium term assets, the value and nature of the unutilized portion of loans commitments, overdraft utilizations, and the impact of contingent liabilities such as letters of guarantees and letters of credit.

- Funding approach

Liquidity Sources are regularly reviewed by independent team in the bank Assets and liabilities management for the purpose of maintaining a wide diversification by currency geography source of products and maturities.

D- Fair value of financial assets and liabilities
D-1 Financial instruments not measured at fair value

The table below summarizes the carrying amounts and fair values for those financial assets and liabilities not presented in the bank's balance sheet at their fair value:

In thousand Egyptian pound	30/09/2023		31/12/2022	
	<u>Book value</u>	<u>Fair value</u>	<u>Book value</u>	<u>Fair value</u>

-Corporate	62,660,168	62,660,168	64,359,486	64,359,486

E- Capital management

The bank's objectives behind capital management which include items in addition to equity section reported in the balance sheet are represented in the following:

- Compliance with capital legal requirements in Egypt.
- Protecting the bank's ability to continue as a going concern and enabling it to generate yield for shareholders and other parties dealing with the bank.
- Maintaining a strong capital base to enhance business growth.

Capital adequacy and uses are reviewed daily in accordance with the regulatory authority's requirements (Central Bank of Egypt) by the bank's management through models based on Basel Committee on Banking Supervision; these data are submitted to the Central Bank of Egypt on quarterly basis.

CBE requires the following from the bank:

- Maintaining LE 5 billion as a minimum requirement for the issued and paid up capital.
- Maintaining a percentage of 12.50 % or more between capital elements and risk-weighted asset and contingent liability elements.

The Bank is recognized as a single group that includes the Bank in all its branches at home and abroad and all other financial companies in which owned its or related parties hold more than 50% of the shareholders' equity or any percentage that enables it to control.

F- Capital management (continue)

The numerator of the capital adequacy comprises the following 2 tiers:

Tier 1:

Core capital: it is the basic capital which comprises paid up capital (after deducting the carrying amount of the treasury stocks) and retained earnings and reserves resulting from dividends except the general banking risks reserve any previously recognized goodwill and any accumulated deficit are to be deducted.

Additional capital: it is carried forward profit & loss and minority rights and difference between nominal value and fair value for subordinated loan.

Tier 2:

It includes 45% of each of (foreign exchange reserve value reserve for financial investments in Associates companies) subordinated loan and impairment provisions against debt instruments facilities and contingent obligations for the first stage with no more than 1.25% of the trade credit of the contingent assets and liabilities weighted by risk. When applying the standard method.

When calculating the total numerator of capital adequacy continued capital after deductions should not be less than 4.5 % from total credit risk operating risk and market risk. And tier I capital should not be less than 8.50 % from total credit risk operating risk and market risk; and subordinated loan should not exceed 50% of tier 1.

The bank has complied with all local capital requirements during the last two years. The following schedule summarizes the components of Tier I capital Tier II capital and capital adequacy ratio as of 30 September 2023.

Capital adequacy ratio as per Basel II requirements

4- Significant accounting estimates and assumptions

The bank applies estimates and assumptions that affect the amounts of assets and liabilities disclosed in the next financial period. Estimates and assumptions are continuously assessed based on past experience and other factors including the expectations of future events that are believed to be reasonable in light of the available circumstances and information.

A - Impairment losses for loans and advances (expected credit losses)

The Bank reviews its loan portfolios to assess impairment on quarterly basis at least. In determining whether impairment loss should be recorded in the income statement, the bank has to identify if there is objective evidence indicating a decline in the expected future cash flows from loan portfolio before identifying any decline on individual basis. This evidence includes data indicating negative changes in a borrower's portfolio ability to repay to the bank or local or economic circumstances related to default of bank assets. Upon scheduling future cash flows, the management uses estimates based on prior loss experience to determine the credit impairment loss for assets when there is objective evidence of impairment similar to that of the portfolio. The methods and assumptions used in estimating both the amount and timing of the future cash flows are reviewed on a regular basis to minimize any differences between the estimated loss and actual loss based on experience.

B - Impairment of investments in equity instruments at fair value through other comprehensive income

The bank determines the impairment loss relating to available-for-sale equity investments when there is a significant or prolonged decline in the fair value below its cost. A judgment is required to determine that the decline is significant or prolonged. In making this judgment, the bank evaluates, among other factors, the usual volatility of the share price. In addition, impairment loss may be recognized when there is evidence of deterioration in the investee's financial condition or operating performance, cash flow industry or sector performance, or in changes in technology.

C - Impairment of Financial investment at amortized cost

The non-derivative financial assets with fixed or determinable payments and fixed maturity dates are classified as held-to-maturity. This classification requires a high degree of judgment; in return, the bank assesses the intention and ability to hold such investments to maturity. If the bank fails to hold such investments till maturity, except for certain circumstances (selling an insignificant amount of held-to-maturity investments near to maturity date), then all held-to-maturity investment portfolio should be reclassified as available-for-sale, which will be measured at fair value instead of amortized cost. In addition, the bank should cease classifying investments as held-to-maturity.
